Professional summary

As a dedicated and passionate Full MERN Stack Web Developer, I have cultivated a strong foundation in front-end development through hands-on experience and academic projects. My technical expertise includes HTML5, CSS3, and modern JavaScript (ES6+), with a particular focus on React.js for creating nice and responsive user interfaces. I am solid in using tools like Git for version control, allowing me to collaborate effectively in team environments.

My experience includes developing and deploying web applications, integrating RESTful APIs, and ensuring cross-browser compatibility. I have a keen eye for detail and a commitment to writing clean, maintainable code. Additionally, my problem-solving skills and ability to quickly learn new technologies make me a valuable asset to any development team. I am eager to leverage my skills and continue growing as a full stack developer.
